Copy Rules to Keep in Mind

KNOW WHO YOU’RE TALKING TO: Know our target the same way you know your best friend—their likes, dislikes, and how they spend their time. This will help you craft copy they’ll want to read.

WRITE FOR READERS WHO SCAN: Alas, these days, people don’t want endless prose. Time is precious, so keep your copy concise. Unless it adds a lot of color, it usually detracts.

MAKE SURE YOUR MESSAGE IS CLEAR: Clarity is key. Make sure the takeaway for your reader is crystal clear, especially when it comes to CTAs.

CREATIVITY: Finding new ways to articulate and communicate information will always pay off.

CRAFT A COMPELLING HEADLINE: Headlines are the first things people notice. Be clever with your copy, and always keep headlines concise.

EDUCATE: Tell readers what they need to know, not just what we want to say. Give them the exact information they need, along with opportunities to learn more.

CONSISTENCY: Make sure headlines, body, and subheadline copy are all the same style when it comes to sentence case, title case, and punctuation. For example, do all headlines have a period at the end, are all headlines in sentence case, etc.? No hard and fast rules here; whatever looks best to you is great. Just be consistent when you establish those rules.
